Dr. Guy Bunker, CEng MIET

Chief Scientist, Distinguished Engineer

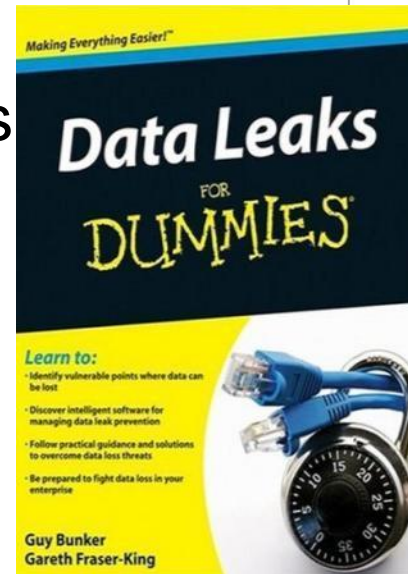

- 13 years at Symantec (via Veritas)
- Active member of EPG, Jericho Forum & ENISA
- Current responsibilities include Symantec cloud computing strategy
- Data sharing is essential for business today – there is no going back!
- The only constant is change
- New delivery models for IT create new risks and challenges
- Understanding the risks and consequences enables an appropriate solution to be created

Des Powley Oracle

- What is really important – data and how it is stored or the value of the information held?
- Are we focused in the right direction. We seem to be overly concerned about data sharing – is there not more danger in how the data is collected and validated?
- The technology always seems to be the focus yet it is always human frailty that causes the issue. Is there also not a conversation about Management, Governance and liability that needs to inform this debate.
